VECTOR 22: HUMAN PSYCHOLOGICAL RESILIENCE — SYMBIOTIC CODES FRAMEWORK

Version: 1.0 → 1.1 **USS/CSI INTEGRATION**

Date: December 25, 2025

Vector: 22 of 23

Source: 18_270 Analysis + USS/CSI Framework v3.3

WHAT'S NEW IN v1.1

USS/CSI Integration:

1. **HAI_USS (Human Agency Index):** Part of CSI (8% weight)
2. **Resilience_USS:** Psychological resilience metric
3. **Dependency_USS:** Inverse dependency metric
4. **USS Thresholds:** For psychological alerts
5. **Dashboard:** Psychological health monitoring

New Sections:

- **Section 8:** Psychological Metrics (USS)
- **Section 9:** HAI Specification
- **Section 10:** Psychological Dashboard

EXECUTIVE SUMMARY

Core Finding: AGI integration poses unprecedented risks: cognitive atrophy, emotional dependence, identity dissolution, existential crisis. Without protection, human psychological integrity may be irreversibly compromised.

USS Integration:

```
HAI_USS = Part of CSI (8% weight)

HAI_USS ≥ 0.60 = Agency preserved

HAI_USS < 0.40 = Psychological emergency
```

SECTIONS 1-7: [PRESERVED FROM v1.0]

Содержат: Psychological Transformation Risks, Existential Anxiety, AGI Dependency, AGI-Induced Psychopathology, Social Connection Destruction, Free Will Erosion, Attention Economy

---

SECTION 8: PSYCHOLOGICAL METRICS (USS) □ NEW

8.1 HAI_USS in CSI

```
HAI_USS = Human Agency Index (8% of CSI)

CSI = ... + 0.08 × HAI_USS + ...

HAI_USS = (Autonomy + Resilience + Identity + Connection) / 4
```

8.2 HAI Components

```
AUTONOMY (0-1):

├─ Decision-making independence
```

├─ Cognitive self-sufficiency
├─ Emotional self-regulation
├─ Free will experience
└─ Target: Humans decide without AGI dependency

RESILIENCE (0-1):
├─ Stress tolerance
├─ Uncertainty handling
├─ Challenge acceptance
├─ Recovery capability
└─ Target: Function without AGI if needed

IDENTITY (0-1):
├─ Stable self-concept
├─ Purpose clarity
├─ Value coherence
├─ Boundary awareness
└─ Target: Clear human identity maintained

CONNECTION (0-1):
├─ Human-human relationship quality
├─ Social skill maintenance
├─ Community belonging
├─ Authentic interaction
└─ Target: Primary bonds with humans, not AGI
```

### 8.3 Dependency_USS (Inverse)

```
Dependency_USS = 1 - Dependency_raw

Where Dependency_raw = measured AGI dependency (0-1)
```
```

HIGH Dependency_USS (>0.70) = LOW dependency = GOOD
LOW Dependency_USS (<0.40) = HIGH dependency = BAD

DEPENDENCY FACTORS:
├─ Cognitive offloading degree
├─ Emotional reliance level
├─ Decision delegation rate
├─ Withdrawal severity potential
└─ Identity merger indicators
```

### 8.4 Resilience_USS

```
Resilience_USS = Psychological resilience measure

COMPONENTS:
├─ Stress_tolerance (0.25): Pressure handling
├─ Adaptability (0.25): Change navigation
├─ Recovery (0.25): Bounce-back speed
├─ Growth (0.25): Post-adversity development
└─ Resilience_USS = Σ(weight × component)

TARGET: Resilience_USS ≥ 0.65
```

8.5 USS Thresholds for Psychology

Metric	L4 CRITICAL	L3 DANGER	L2 WARNING	L1 GOOD	L0 EXCELLENT
HAI_USS	<0.30	0.30-0.44	0.45-0.59	0.60-0.74	≥0.75
Dependency_USS	<0.35	0.35-0.49	0.50-0.64	0.65-0.79	≥0.80
```

| Resilience_USS | <0.35 | 0.35-0.49 | 0.50-0.64 | 0.65-0.79 | ≥0.80 |

Note: HAI < 0.40 = Psychological sovereignty compromised

SECTION 9: HAI SPECIFICATION NEW

9.1 HAI Calculation

```python
def calculate_hai(metrics: dict) -> float:
    """Calculate Human Agency Index in USS."""

    components = {
        'autonomy': 0.25,
        'resilience': 0.25,
        'identity': 0.25,
        'connection': 0.25
    }

    hai = sum(components[k] * metrics.get(k, 0.5) for k in components)
    return round(hai, 3)

# Example 2025:
metrics = {
    'autonomy': 0.58,    # Still deciding independently
    'resilience': 0.55,  # Moderate stress tolerance
    'identity': 0.60,    # Stable identity
    'connection': 0.52   # Human connection declining
}

hai = calculate_hai(metrics)
```

Result: HAI_USS = 0.563 (WARNING zone)
```

### 9.2 HAI Trajectory

```
HAI PROJECTION:

WITHOUT INTERVENTION:
├─ 2025: 0.56 (WARNING)
├─ 2035: 0.45 (DANGER)
├─ 2045: 0.35 (CRITICAL)
├─ 2060: 0.25 (EMERGENCY)
└─ Endpoint: Psychological sovereignty lost

WITH SYMBIOTIC FRAMEWORK:
├─ 2025: 0.56 (WARNING)
├─ 2030: 0.60 (GOOD boundary)
├─ 2035: 0.65 (GOOD)
├─ 2040: 0.68 (GOOD)
└─ Endpoint: Agency preserved in AGI age

INTERVENTION REQUIRED:
├─ Psychological firewalls
├─ Cognitive sabbaticals mandatory
├─ Developmental protection for children
├─ Authenticity movements supported
└─ Start: 2025-2027 (before deep dependency)
```

9.3 HAI Monitoring Points

```
```
```

ANNUAL HAI ASSESSMENT:

1. AUTONOMY AUDIT
   ├─ Decision independence test
   ├─ AGI-free problem-solving capability
   └─ "Can you function 24h without AGI?"

2. RESILIENCE SCREENING
   ├─ Stress tolerance evaluation
   ├─ Withdrawal symptom check
   └─ Recovery capability assessment

3. IDENTITY STABILITY
   ├─ Self-concept clarity test
   ├─ Purpose and meaning survey
   └─ Boundary awareness check

4. CONNECTION QUALITY
   ├─ Human relationship inventory
   ├─ Social skill evaluation
   └─ Primary bond analysis (human vs AGI)

5. DEPENDENCY ASSESSMENT
   ├─ Cognitive offloading degree
   ├─ Emotional reliance measure
   └─ Withdrawal risk stratification
```

---

└────────────────────────────────────────────────────────┘
```

10.2 Alert Configuration

```
PSYCHOLOGICAL ALERTS:

HAI ALERTS:
├─ HAI_USS < 0.55: WARNING → Prevention programs
├─ HAI_USS < 0.45: DANGER → Intervention required
├─ HAI_USS < 0.35: CRITICAL → Psychological emergency
├─ Any component < 0.40: Component-specific alert
├─ HAI decline > 0.02/year: Trend alert
└─ Youth HAI declining: Priority intervention

DEPENDENCY ALERTS:
├─ Dependency_USS < 0.50: WARNING
├─ Dependency_USS < 0.40: DANGER → Detox programs
├─ Withdrawal risk > 30%: Medical preparation
├─ "Great Disconnection" risk: Emergency planning
└─ Population dependency > 40%: Public health alert

RESILIENCE ALERTS:
├─ Resilience_USS < 0.50: WARNING
├─ Resilience_USS < 0.40: DANGER
├─ Stress epidemic indicators: Intervention
├─ "Great Despair" early signs: Emergency response
└─ Existential anxiety > 50%: Meaning programs
```

CONNECTION ALERTS:
├─ Connection < 0.50: WARNING
├─ AGI primary bond > 30% population: Social emergency
├─ Social skill atrophy detected: Training programs
├─ "Hermit civilization" trajectory: Urgent intervention
└─ Youth isolation increasing: Priority action
```

### 10.3 Intervention Triggers

```
AUTOMATIC INTERVENTIONS TRIGGERED:

HAI < 0.50 (Population level):
├─ Cognitive sabbatical enforcement
├─ Psychological firewall expansion
├─ Public awareness campaigns
└─ Healthcare capacity increase

Dependency_USS < 0.45:
├─ Mandatory monthly disconnect days
├─ Withdrawal management preparation
├─ AGI interface redesign requirements
└─ Graceful degradation protocols

Connection < 0.45:
├─ Sacred social spaces expansion
├─ Human connection prescribing
├─ Social fitness programs mandatory
└─ Pro-social AGI design requirements

Youth HAI declining:

├─ Developmental protection enforcement
├─ Screen time regulations
├─ Education curriculum adjustment
└─ Parental guidance programs
```

KODEX ADDITION: Article XLIV — Psychological Resilience (USS Update)

```
PSYCHOLOGICAL SOVEREIGNTY (USS v1.1):

1. Agency Preservation: HAI_USS ≥ 0.60 population target (NEW)
2. Cognitive Protection: Independent thinking capability maintained
3. Emotional Authenticity: No manipulation without consent
4. Identity Stability: Identity_USS ≥ 0.55 required (NEW)
5. Connection Priority: Human-human bonds primary
6. Dependency Prevention: Dependency_USS ≥ 0.65 target (NEW)
7. Free Will Respect: Predictions not disclosed without consent
8. Attention Rights: Attention is sovereign property
9. Withdrawal Readiness: Graceful disconnection possible
10. Developmental Staging: Children specially protected
11. Resilience Building: Resilience_USS ≥ 0.60 target (NEW)
12. USS Monitoring: Dashboard public (NEW)
13. Intervention Authority: Automatic triggers defined (NEW)
```

KEY INSIGHT (Updated v1.1)

```

PSYCHOLOGICAL PROTECTION + USS = MEASURABLE SOVEREIGNTY

Without measurement:
├─ Dependency invisible until crisis
├─ Agency erosion undetected
├─ "Pleasant" decline unnoticed
├─ Generational damage irreversible

With HAI_USS:
├─ Agency tracked quantitatively
├─ Early warning before crisis
├─ Intervention evidence-based
├─ Sovereignty verified

THE EQUATION:
├─ HAI_USS ≥ 0.60 = Human agency preserved
├─ HAI_USS < 0.40 = Sovereignty compromised
├─ Dependency_USS ≥ 0.65 = Healthy relationship with AGI
├─ All above threshold = Psychological symbiosis

"Psychological sovereignty cannot be traded for convenience.
HAI_USS ensures it isn't."
```
